

Patrick De Decker holds a degree of MSc in Chemical Engineering from the University of Ghent, Belgium. He joined the Petrofina group (now part of **TotalEnergies**) in 1983 and worked for 25 years in the petrochemical platform in Antwerp in various technical, logistical and performance analysis functions. He's been involved in climate issues, and the European ETS in particular, since 2014 and joined the Climate Strategy department in 2018, focusing on CO2 emissions and carbon pricing initiatives. He represents the Group in various national and international associations.
